

Customizing Header Text & Subheader Text

Header and Subheader functions are part of the template. To adjust it, you need to work do it in the Template Editor.

And here's how:

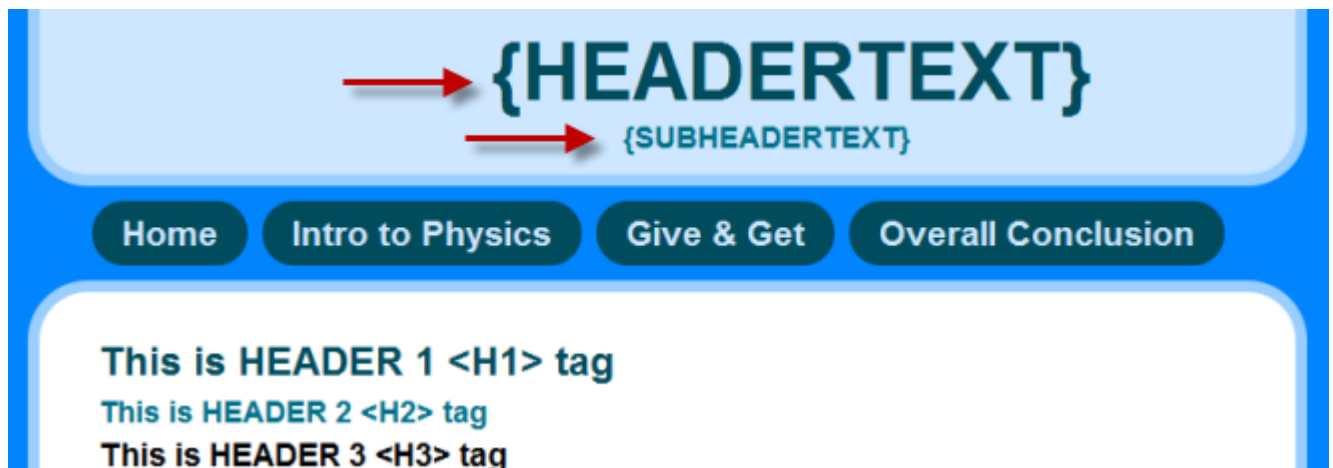

Step 1: Go to "Sites" then click "Site Templates".

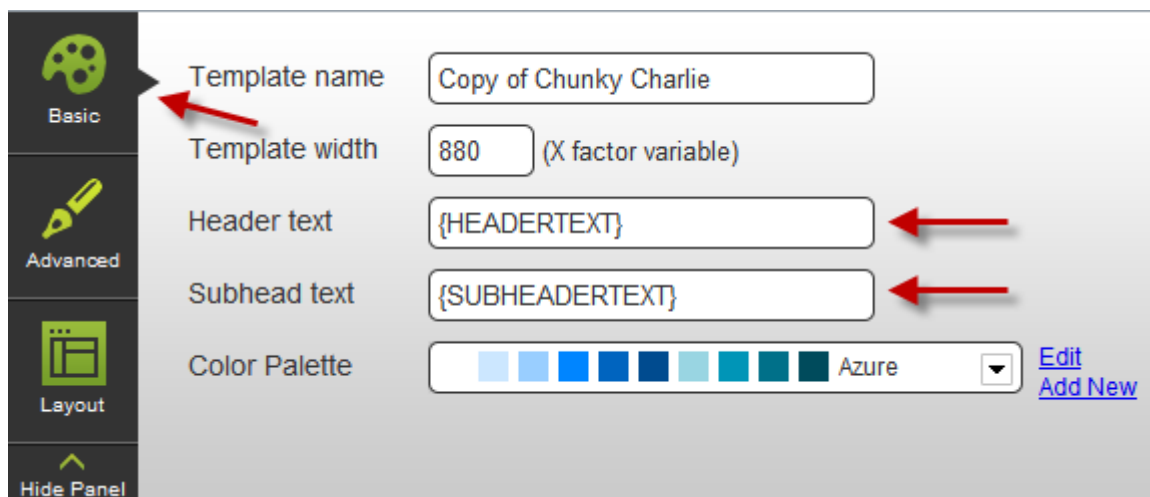

Step 2: Select the template which you want to add the header image. If it's the free default template, make sure that you have duplicated and customize its copy version.

Step 3: The default template contains the & for you already.

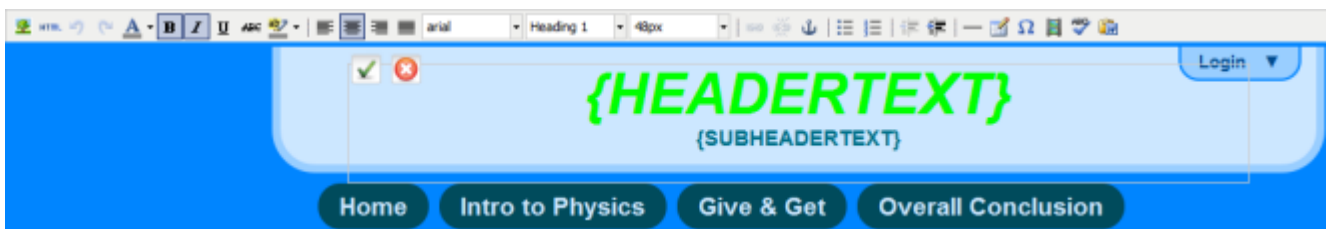

Step 4: If you create your own template from scratch and want to insert it, only use these tag in the "Basic" and "Header Text" & "Subhead Text" options.

Step 5: For the default template, if you would like to get rid of the "Header Text" or the "Subhead Text", then just click or hover over the element and click the "x" icon to delete.

Step 6: If you wish to adjust its size, font or color, you need to click the pencil to get accessed to the editing menu.

Step 7: If you want to resize the element, only have a click on it and drag to resize it from the green dot line. Once you finish everything, click "Save" to save changes.

Step 8: In order to enter the text, you need to go to your funnel or membership site. Click **"Edit"**.

Content Site Name	
Rename Example Membership <small>http://example.com/membership</small>	 Edit  More ▾
Jared the Bunny - memsite <small>http://example.com/memsite</small>	 Edit  More ▾
Payment in memsite <small>http://example.com/payment</small>	 Edit  More ▾
imadorable.com <small>http://example.com</small>	 Edit  More ▾

Step 9: Go to **"Options"**.

 New Page	 Preview	 Options	 Export	 Upload	 Close
--	---	---	--	--	---

Time release	Membership	Force Show Menu
<input type="checkbox"/> Delay <input type="checkbox"/> Release		<input type="checkbox"/>
<input type="checkbox"/> Delay <input type="checkbox"/> Release	<ul style="list-style-type: none">Level 1Level 2cart#2cart#1	<input checked="" type="checkbox"/>

Step 10: Apply the text at **"Header text"** & **"Subheader text"**. And **"Save"**.

Logo & Header Settings (optional)	
Logo Image	<input type="text" value="No file selected"/> <input type="button" value="Choose File"/>
Header text	<input type="text" value="All In One Hypnotherapy"/> ←
Subheader text	<input type="text" value="Download Area"/> ←

Step 11: The text applied will have the font format as per the settings in the "Template Editor".
