

How to Add A New Individual Subscriber to the Mailing List

FusionHQ allows you to add a new individual subscriber to your mailing list. **We do not allow you to import the bulk list of subscribers to the mailing list.**

This is how:

Step 1: Go to "Autoresponder" and continue to "Subscribers".

Step 2: Below the subscriber list, you can find the option to add a new subscriber. Enter the email of the new subscriber and select the mailing list from the drop-down menu. Next, click "Add member" button.

Step 3: The new subscriber is now added to the mailing list.
