

How to Add A New Page

This tutorial shows you how to have more pages on your website. It's very easy.

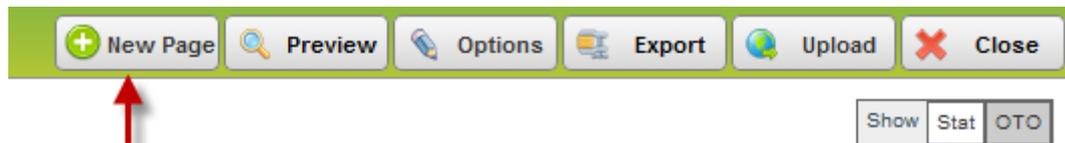

Step 1: Go to the funnel or content site which you want to have more pages.

The screenshot shows the FusionHQ interface with the 'Sites' tab selected. Below the navigation bar, there is a search field and a 'Start New Funnel' button. A table lists several funnels with columns for 'Funnel Name', 'Views', and 'Sales'. Each row has 'Edit', 'Duplicate', and 'Delete' buttons. A red arrow points to the 'Edit' button for the 'Buy Now#1' funnel.

Funnel Name	Views	Sales	Actions
Buy Now#1 http://tanya.doubleexpert.com/tanya/buynow1/	7	3	Edit Duplicate Delete
Test ClickBank http://tanya.doubleexpert.com/tanya/clickbank/	12	8	Edit Duplicate Delete
Test Payment 1ShoppingCart http://tanya.doubleexpert.com/tanya/1shoppingcart/	1	0	Edit Duplicate Delete
Test Shopping Cart http://tanya.doubleexpert.com/tanya/shoppingcart/	2	0	Edit Duplicate Delete

Step 2: On the top right corner, click "New Page".

The screenshot shows a toolbar with several buttons: '+ New Page', 'Preview', 'Options', 'Export', 'Upload', and 'Close'. A red arrow points to the '+ New Page' button. Below the toolbar, there are three buttons: 'Show', 'Stat', and 'OTO'.

Step 3: At the "Funnel Page Options", you can enter the name of the page (*ie. Thank You, Welcome*). Note that special characters (*ie. quotation mark or question mark*) are not allowed.

Funnel Page Options ✕

Create a new page

Name  Thank You

Create as

- Blank page
- Duplicated page
- Redirect URL

Color  Yellow ▾

Group

« Fixed page

URL style Encrypt Slug

Save **Cancel**

Step 4: If the "**Blank page**" option is selected, it means that the new page will have no content. You are free to add any content you want.

Funnel Page Options ✕

Create a new page

Name

Create as  Blank page

- Duplicated page
- Redirect URL

Color  Yellow ▾

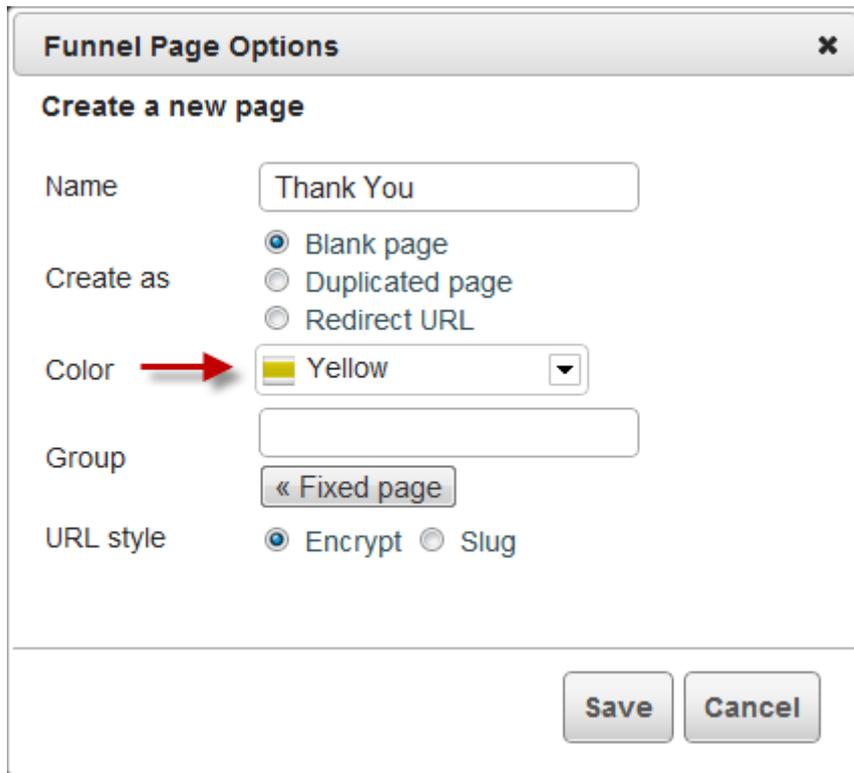

Group

« Fixed page

URL style Encrypt Slug

Save **Cancel**

Step 5: "Color" allows you to categorize the page. You may keep the pages with similar contents on the same color. So, it's easy for you to notice.

Funnel Page Options [X]

Create a new page

Name: Thank You

Create as:
 Blank page
 Duplicated page
 Redirect URL

Color:  Yellow [v]

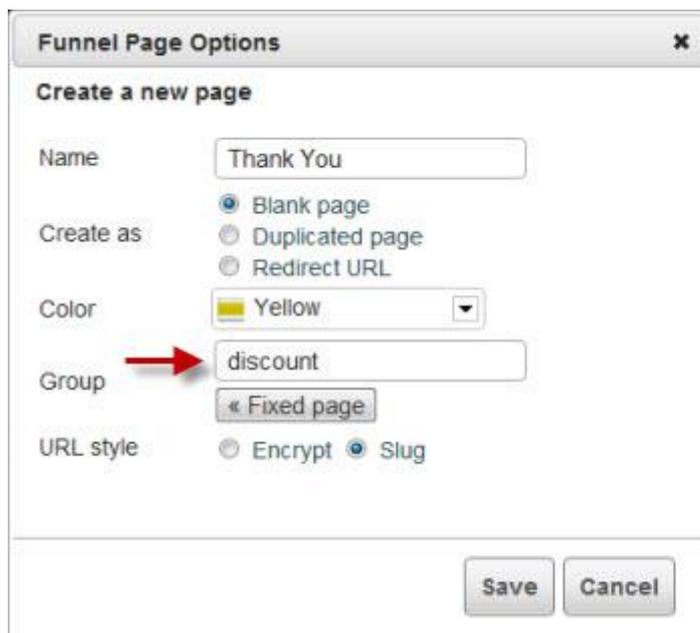

Group: [Empty text box]

URL style: Encrypt Slug

« Fixed page

Save Cancel

Step 6: You can group or categorize the page by using the **"Fixed page"** option as well. It will keep the pages together so it will be easier to move its location within the **"Funnel Map"** or **"Sitemap"**.

Funnel Page Options [X]

Create a new page

Name: Thank You

Create as:
 Blank page
 Duplicated page
 Redirect URL

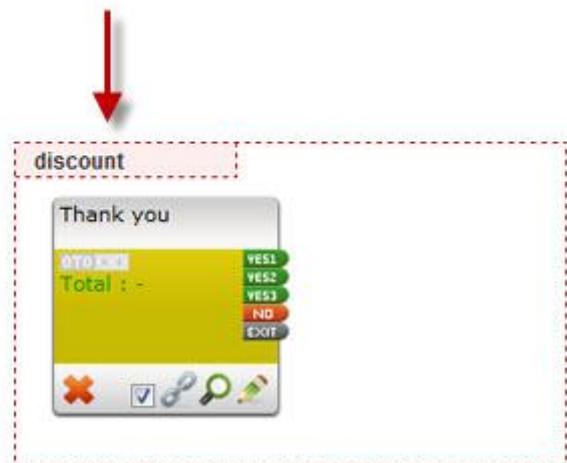

Color:  Yellow [v]

Group: discount

URL style: Encrypt Slug

« Fixed page

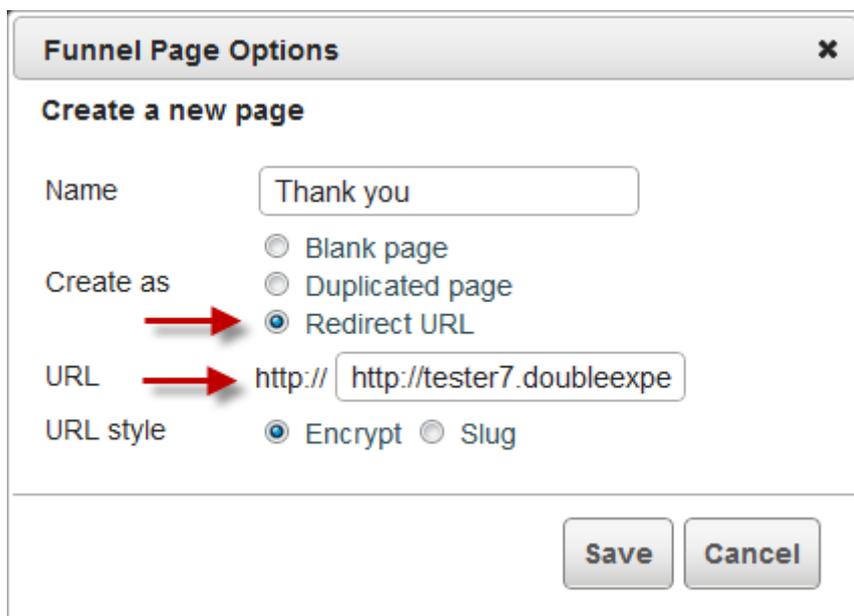

Save Cancel

Step 7: If the "Duplicated page" option is selected, it means that the page will have exactly the same content with the page which you duplicated it from. You can choose the page which you want to duplicate from the drop-down menu.

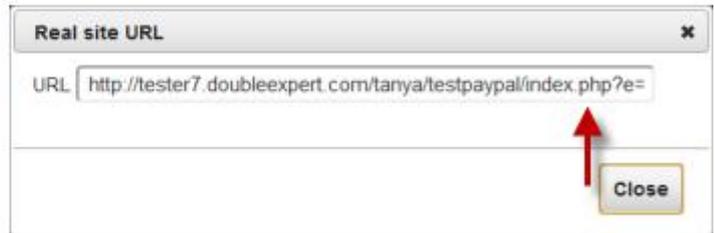

Step 8: If you select the "Redirect URL" option, it means that this page will bring your customers to another page with the specified url. Enter the url which you want to bring your customers to in the "URL" input box.

Step 9: "URL style" allows you to select the url type of your page. **"Encrypt"** gives you the long url which is generated from the system. This is a unique url and it's for this page only.

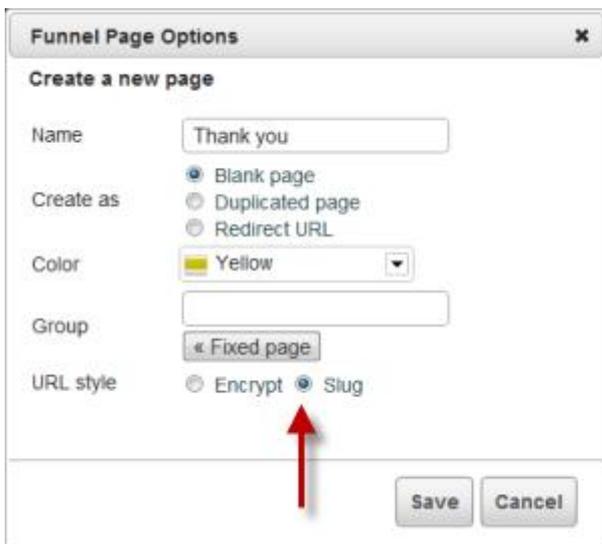

The screenshot shows the 'Funnel Page Options' dialog box. The 'Name' field contains 'Thank You'. Under 'Create as', 'Blank page' is selected. The 'Color' is set to 'Yellow'. The 'Group' is 'discount'. Under 'URL style', 'Encrypt' is selected, indicated by a red arrow pointing to the radio button.

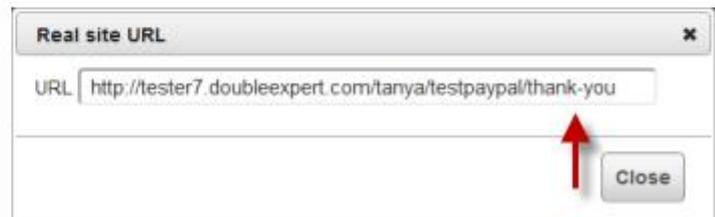

The screenshot shows the 'Real site URL' dialog box. The URL field contains a long, complex URL: `http://tester7.doubleexpert.com/tanya/testpaypal/index.php?e=`. A red arrow points from the 'Encrypt' option in the previous dialog to this URL. A 'Close' button is visible at the bottom right.

Step 10: "Slug" is the option to apply the name of the page as its url.

The screenshot shows the 'Funnel Page Options' dialog box. The 'Name' field contains 'Thank you'. Under 'Create as', 'Blank page' is selected. The 'Color' is set to 'Yellow'. The 'Group' is empty. Under 'URL style', 'Slug' is selected, indicated by a red arrow pointing to the radio button.

The screenshot shows the 'Real site URL' dialog box. The URL field contains a simple URL: `http://tester7.doubleexpert.com/tanya/testpaypal/thank-you`. A red arrow points from the 'Slug' option in the previous dialog to this URL. A 'Close' button is visible at the bottom right.

After that, **"Save"** to keep changes.
