

# How to Add the Header Image

Add the header image to make your website more attractive and easy for people to recognize.

This is how to do:

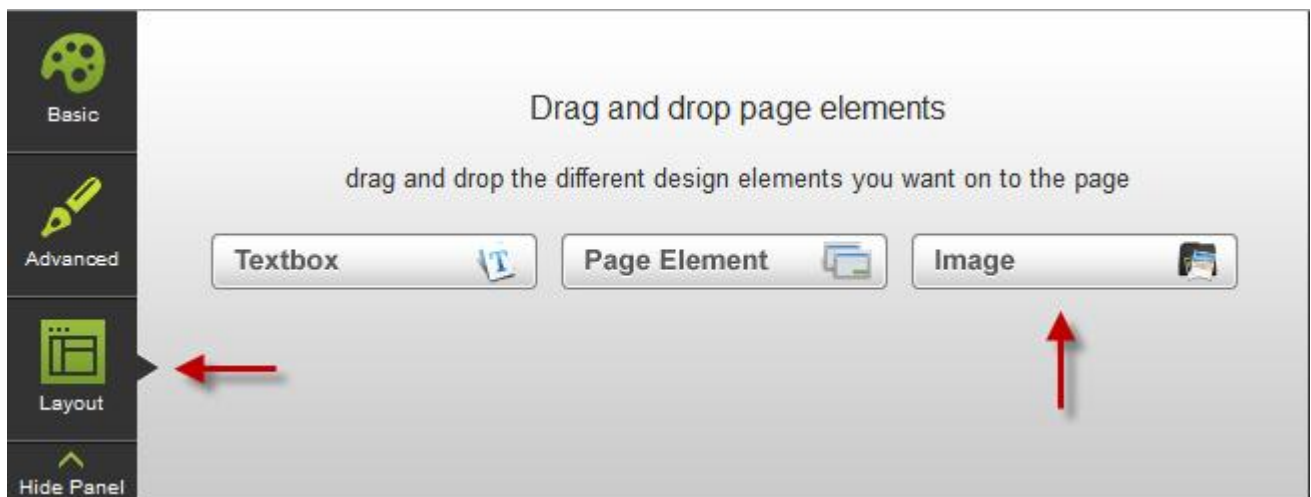

**Step 1:** Go to "Sites" then click "Site Templates".

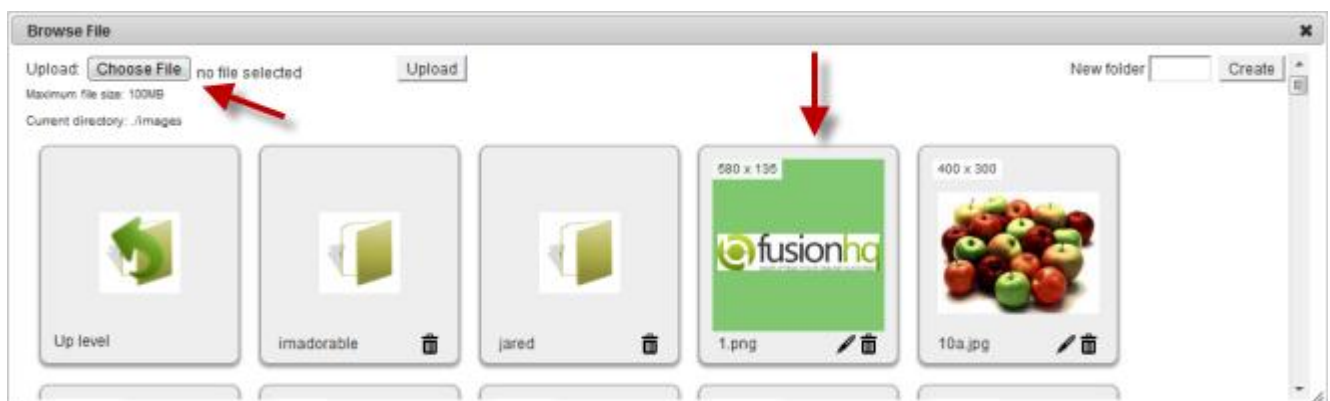

**Step 2:** Select the template which you want to add the header image. If it's the free default template, make sure that you have duplicated and customize its copy version.

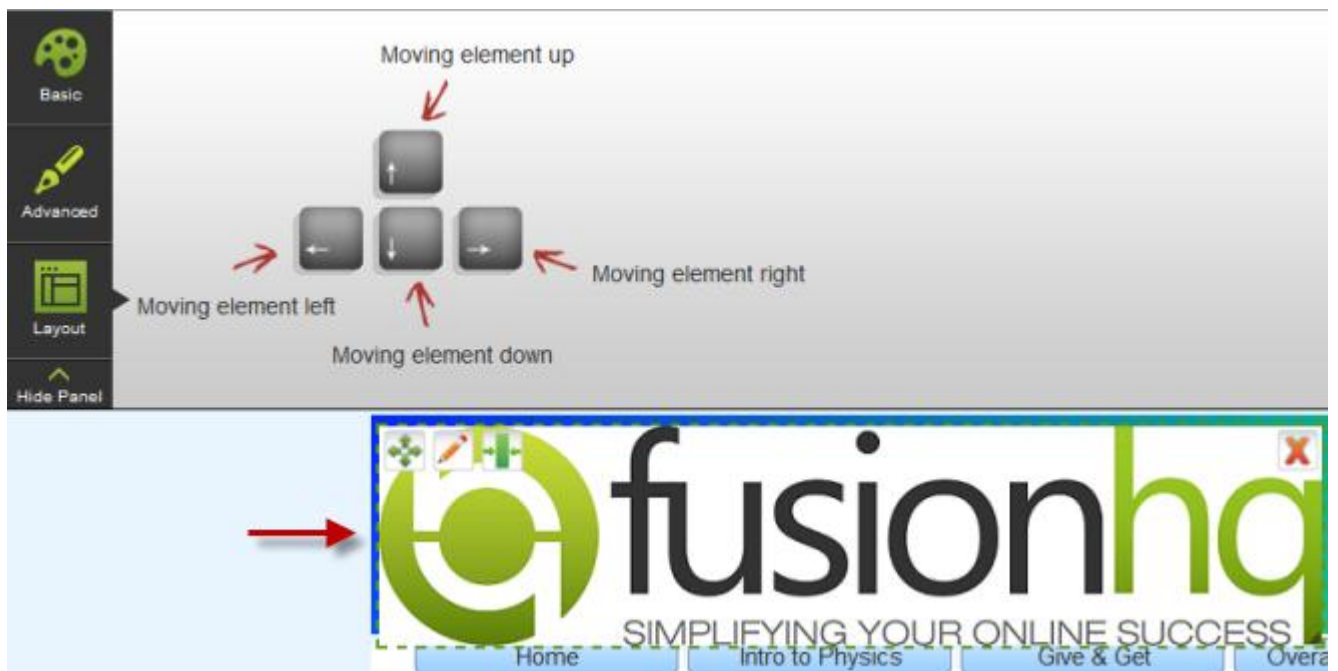

**Step 3:** Click "**Layout**" and select and drag the "**Image**" button to the header area.

**Step 4:** Choose the already-uploaded image or click "**Browse**" to upload the new one.

**Step 5:** The image is now inserted. You need to move locate it to the correct position you want.

**Step 6:** If the image doesn't fit the header area, the extra space will be replaced by the header background image.

Save the template and apply it to your website.
