

# How to Display A YouTube Video

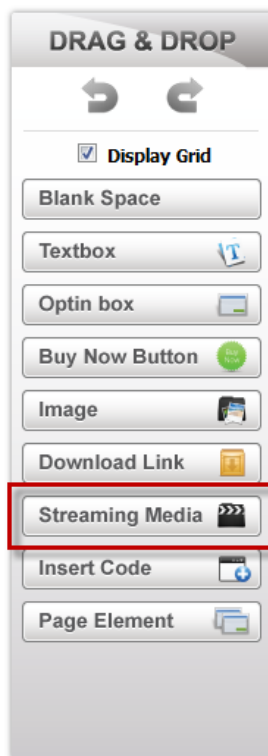

FusionHQ allows you to easily display any YouTube videos on your page created with FusionHQ.

Please follow the instructions below.

**Step 1:** Access the page where you want to display your **"YouTube"** video by clicking on the pencil icon.

**Step 2:** Drag the **"Streaming Media"** element from the Drag and Drop menu onto your page.

**Step 3:** At "Type", you can choose to upload either video or the audio. Inside "Stream provider", select "URL/Youtube". Enter the URL that you have copied from YouTube and paste it into the URL box.

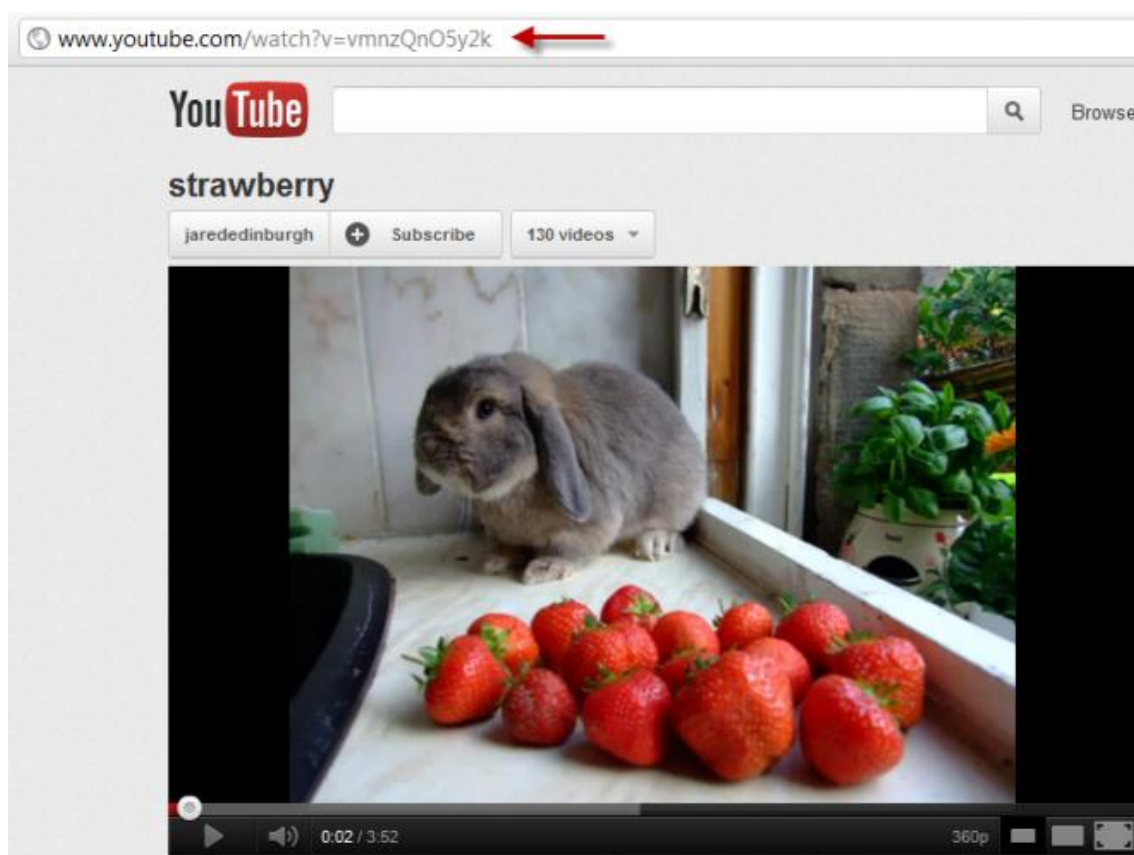

**Stream media option**

Type  Uploading Video  Uploading Audio

Stream provider  CDN  URL/Youtube

URL  (MP4, FLV, H.264, Youtube URL)

**Step 4:** Make sure that the URL from YouTube is copied from your browser.

**Step 5:** Select "Auto Start" and "Disable Control Bar" if you like. These are optional.

- Auto Start
- Disable Control Bar

**Step 6:** Inside "Video Size", tick either "Fix" or "Custom". If you select "Fix", you can choose any size from the drop-down menu.

**Display option**

Video Size  Fix  Custom

W x H 480x385 

**Step 7:** And if you choose "Custom", type in your preferred width and height that fits your video.

**Display option**

Video Size  Fix  Custom 

W 480 H 385

**Step 8:** Browse for a "Pre-start Image" and "Skin Template" if you want to. These are both optional. Click "Reset" to clear the image.

Pre-start Image (Optional) 

Skin Template (Optional) 

Apply and save changes.
