How to Get the FTP Details (FusionHQ Hosting)

If you use FusionHQ hosting service, apart from uploading your website directly through our platform, you are also allowed to access your website structure through the FTP.

FTP or File Transfer Protocol is a standard network protocol used to transfer files from one host or to another host or from your computer to host. You can get your FTP details at the **"Domains & Hosting"** section.

Please follow the steps here:

Step 1: Go to **"Domains & Hosting"** and continue to **"cPanel"**.

Step 2: Under the **"Server Name",** you will find the **"fusionhqhosting"** details. These are your FTP details.

Step 3: Open the FTP tool *(Filezilla or SmartFTP)* installed in your computer and input the details. IP is used as the **"Host"**. You can use the **"Username"** & **"Password"** as given in the **"fusionhqhosting".**
