

How to Import A Project

At this moment, you can have a project which is exported by other FusionHQ member accounts. Make sure that you already get the FusionBox key or url from the exporter. Once the project is imported to your account, you can customize and use it the way you want.

Please follow the steps below to import the project to your FusionHQ account.

Step 1: Go to "Project" section.

The screenshot shows the FusionHQ interface with the 'Projects' tab selected. A red arrow points to the 'Project' dropdown menu. Below the navigation bar, there is a text input field labeled 'Enter new project name here' and a 'Create Project' button. A table lists three projects: 'Jared', 'The bunny', and 'Katube'. Each project row includes a star icon, the project name, and a small description. To the right of each project name are four buttons: 'Manage Components', 'EBB', 'Export', and 'Delete'. At the bottom of the table, there is a text input field labeled 'Enter FusionBox Key Here' and an 'Import' button.

Step 2: Enter the FusionBox key which you received from the exporter in the "Import" box.

A red arrow points to the text input field containing the FusionBox key: `ec80042937abfd7861a22e46879160e5dbc3a`. To the right of the input field is an 'Import' button.

Step 3: Choose a domain. You can "Choose free sub-domain", "My own domain" or "Buy new domain". Then click "Next Step".

Choose the domain where you wish to install your FusionBox

Choose free sub-domain 

My own domain  tanya.chonlawat.com 

Buy new domain 

Next Step 

Step 4: Fill in or confirm your information and then click "Next Step".

Please confirm your details

Project Name

Company Name

Address 1

Address 2

City

State/Province

Zip/Post Code

Country 

Phone +
eg. 1 4805058800

Next Step 

Step 5: Choose a Paypal option... either "My profile" or "New PayPal profile".

Choose your payment gateway

Please select a PayPal account to accept payments from sales pages used within this FusionBox.

My profile  New PayPal profile 

 My Paypal (paypalemail@hotmail.com) 

Next Step 

Step 6: Click "Install" to install and upload your project.

Click intall to setup and upload your FusionBox

Install 

Step 7: Your project is now uploaded successfully.
