

# How to Insert A Logo to Your Website

You can insert a logo to your "Sales Funnel" or "Content site" to make it more professional looking.

Here's how:

**Step 1:** Go to your "Sales Funnel" or "Content Site". Click the edit button or the funnel/content name of the "Sales Funnel" or "Content Site" that you want to put the logo on.

The screenshot shows the FusionHQ dashboard with the 'Sites' tab selected. Below the navigation bar, there is a search bar and a 'Start New Funnel' button. A table lists several funnels with columns for 'Funnel Name', 'Views', and 'Sales'. The 'Edit' button for the 'Test Page' funnel is highlighted with a red arrow.

**Step 2:** Click "Options".

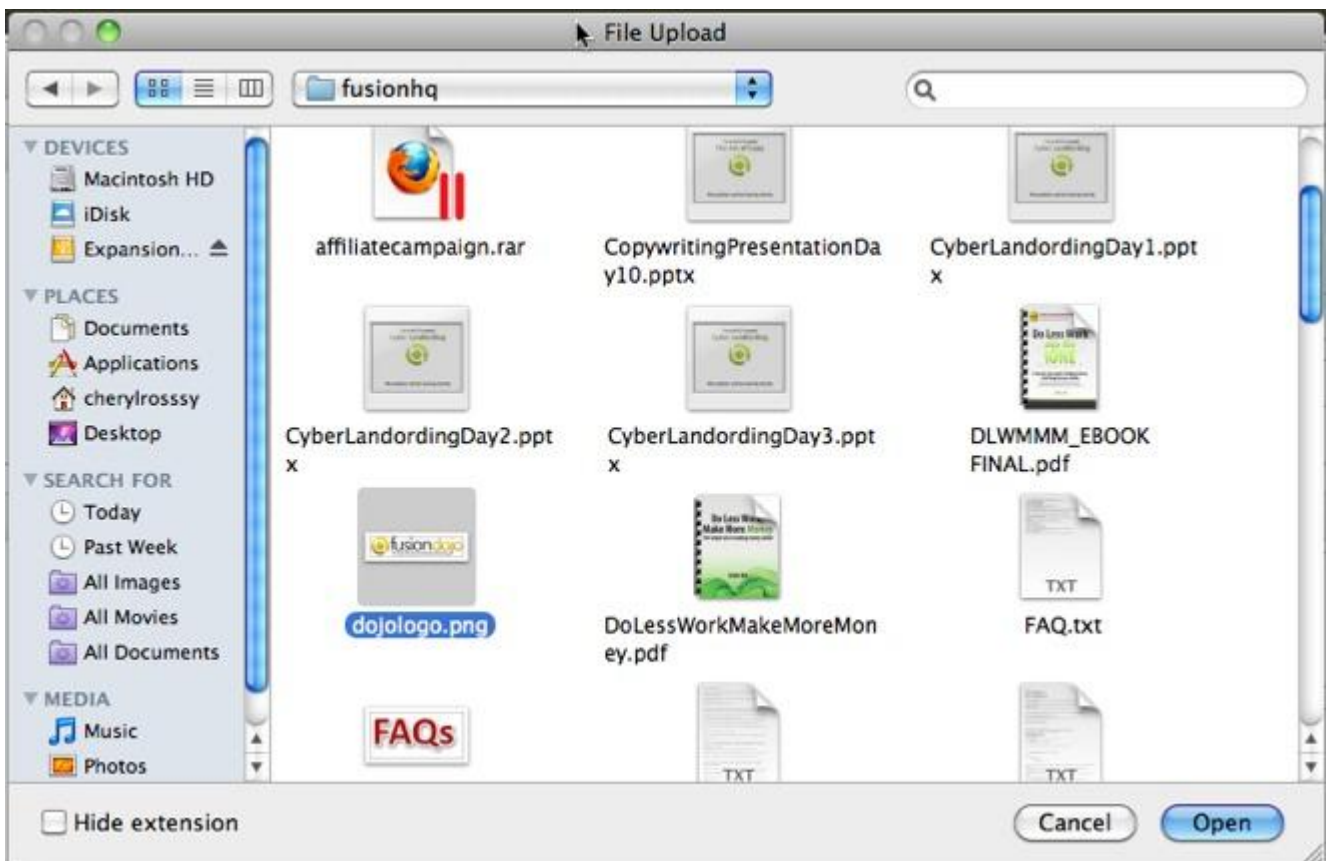

The screenshot shows a row of action buttons: 'New Page', 'Preview', 'Options', 'Export', 'Upload', and 'Close'. The 'Options' button is highlighted with a red arrow. Below the buttons are 'Show', 'Stat', and 'OTO' buttons.

**Step 3:** In "Logo & Header Settings", click "Choose File".

The screenshot shows the 'Logo & Header Settings (optional)' dialog box. It has a 'Logo Image' label and a button that says 'No file selected' and 'Choose File'. The 'Choose File' button is highlighted with a red arrow.

**Step 4:** Choose your logo image.

**Step 5:** And now you have your logo. You can also delete the logo by clicking the "Remove Logo" button.

**Step 6:** Click "**Save**".

The location and size of the logo depends on the design of the template you use with your website.
