

# How to Make An Image Link to A URL (2)

You are now able to insert the link to the image element of Drag & Drop editor. We will show you how...

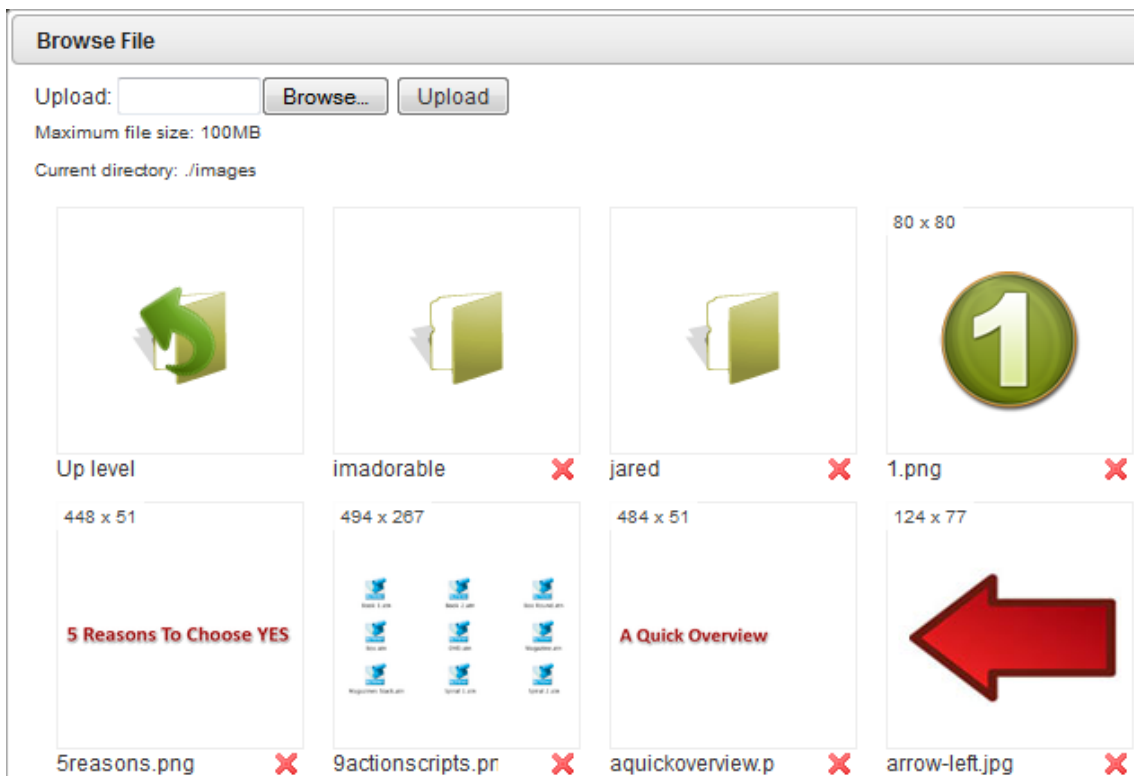

**Step 1:** Open the page that you would like to add your image link to by clicking on the edit button.

**Step 2:** Drag the "Image" from the Drag and Drop menu onto your page.

**Step 3:** Choose the image from the target folder.

**Step 4:** One click at the image to activate the functions on the left side.

**Step 5:** Enter the text which you want to show in case the image doesn't display in "**Alt**". Enter the url which you want to redirect your customers to after they click on the image in "**Link**". At "**Target**", select "**Self**" if you want to open the link in the current window. Or select "**New Window**" if you want to open the link in the new window.

**Step 6:** Once finish, click "**Save**" on the top right of the page.
