# How to Select A Media File From FusionHQ CDN

The best way to share large files is with our dedicated Media Management Server (CDN). This feature is only available for our monthly subscribers. If you are a lifetime member, you can avail this at a low cost.
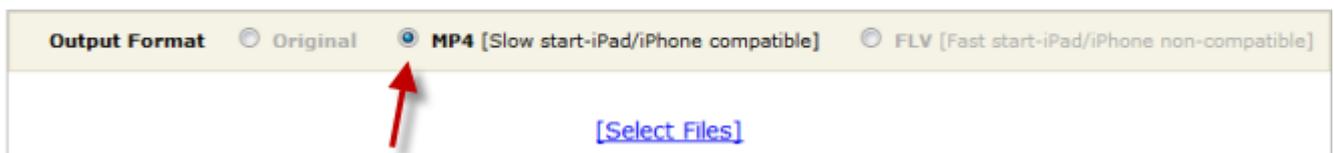

Please follow these instructions...

Step 1: Go to the **"Domain & Hosting"** tab and click **"Media Management".**

Step 2: Select the **"Output Format".** You can select **"Original"** option if you are sure that the file format is correctly encoded. Alternatively, you can select **"MP4"** option if you want to encode your file with our software. You can be sure that your file will properly display with our Streaming Media Tool and it's also compatible with iPad & iPhone. This option is strongly recommended. Select **"FLV"** option if you want to display your media file fast but iPad & iPhone are not supportive.

Step 3: Click **"Select Files"** and browse the file from your computer.

Step 4: Wait until the file is uploaded successfully.

The space limit of your package is 2000 M (the maximum file size for 1 file is 100M)
** Please be aware that large files take time to propagate across the CDN network. It's best to allow at least 12 hours before making your videos live.

| Output Format | ○ Original | ● MP4 [Slow start-iPad/iPhone compatible] | ○ FLV [Fast start-iPad/iPhone non-compatible] |

Upload Complete! Please refresh your browser to see your updated list.
aerobic.mp4 (22 MB) **100%**

[Select Files]

**Supported media formats for our video player are mp4, mov, f4v, flv, 3gp, 3g2, aac, m4a, mp3, vp8, webm, ogv, ogg
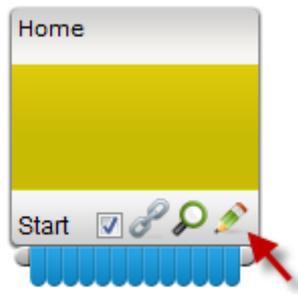

Step 5: After refreshing your browser to see the updated list, you will notice that your newly uploaded video still has a **"Waiting for encode"** status. Just wait a while for it to encode. For bigger files, it usually takes some time.

File name	URL	Size	
14092010009.mp4	http://www.fusionhqmedia.com/cloudfiles/1643/14092010009.mp4	13.88 MB	⊖ Delete
ball1.mp4	http://www.fusionhqmedia.com/cloudfiles/15703/ball1.mp4	50.87 MB	⊖ Delete
123slideshow_com_115935.swf	http://www.fusionhqmedia.com/cloudfiles/4993/123slideshow_com_115935.swf	82.21 KB	⊖ Delete
123slideshow_com_115935.swf	http://www.fusionhqmedia.com/cloudfiles/5003/123slideshow_com_115935.swf	82.21 KB	⊖ Delete
aerobic.mp4	Waiting for encode..	21.92 MB	⊖ Delete

Step 6: Once finish, you can see the url of this media file. This is the direct link of this file.

File name	URL	Size	
14092010009.mp4	http://www.fusionhqmedia.com/cloudfiles/1643/14092010009.mp4	13.88 MB	⊖ Delete
ball1.mp4	http://www.fusionhqmedia.com/cloudfiles/15703/ball1.mp4	50.87 MB	⊖ Delete
123slideshow_com_115935.swf	http://www.fusionhqmedia.com/cloudfiles/4993/123slideshow_com_115935.swf	82.21 KB	⊖ Delete
123slideshow_com_115935.swf	http://www.fusionhqmedia.com/cloudfiles/5003/123slideshow_com_115935.swf	82.21 KB	⊖ Delete
aerobic.mp4	http://www.fusionhqmedia.com/cloudfiles/15713/aerobic.mp4	29.18 MB	⊖ Delete

Step 7: Next, go to the page where you would like to display your video.

Step 8: Drag the **"Streaming Media"** element from the Drag and Drop area onto your page.

Step 9: In the **"Stream Media Options"** section, choose **"Uploading Video"** if it's this is a video. Otherwise, click on **"Uploading Audio"**. Click on **"CDN"** as your stream provider. Choose your newly uploaded video file from the drop down element. If you want your video to start immediately without user interaction then activate **"Auto Start".** You can also disable the control bar of your video if you want.

Step 10: In **"Display Options",** for the size of you video, you can choose either **"Fix"** or **"Custom".** If you choose **"Fix",** just select the size from the dropdown element and if you choose **"Custom",** enter the specific size of width (W) and height (H).You can also have a "**Pre-start Image**" and **"Skin Template"** for your video by clicking the **"Browse"** button and then select your image. These are optional.

Then click **"Apply"** to finish. And once everything is ready, you can save and upload your website.
