

How to Setup Your Paypal Account

For PayPal to work with FusionHQ you need to first make some changes inside PayPal's default settings. We recommend you do this before you create a sales funnel inside FusionHQ.

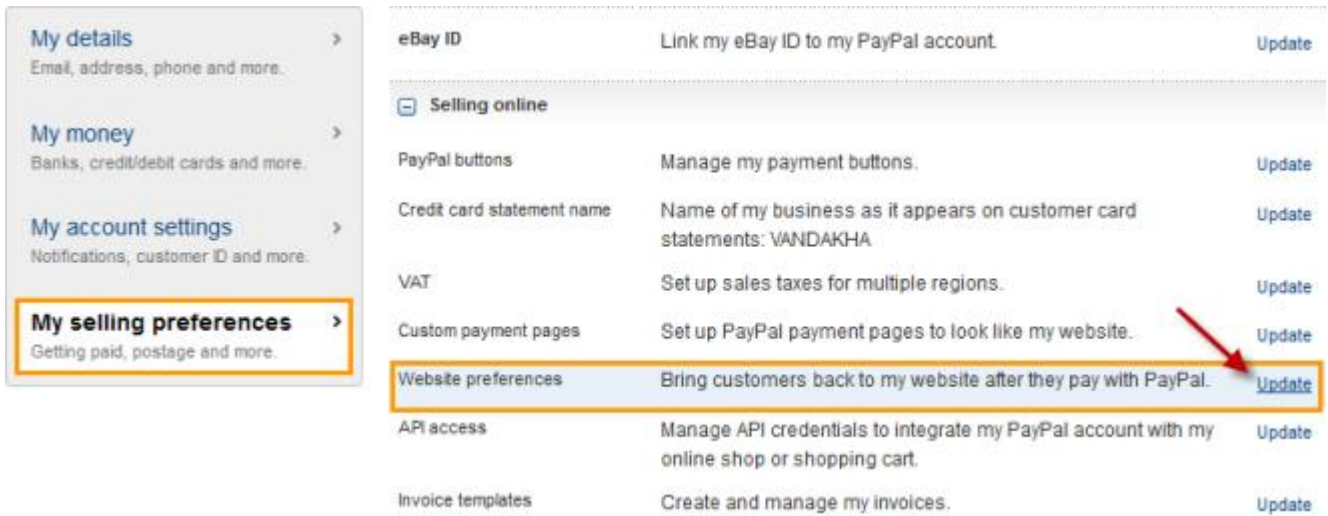

Step 1: Login to your PayPal account.

Step 2: Go to "My Accounts" and then "Profile".

Step 3: Go to "My selling preference" and click "Update" at "Website preferences".

The screenshot shows the PayPal account settings interface. On the left, a sidebar contains four main categories: "My details", "My money", "My account settings", and "My selling preferences". The "My selling preferences" category is highlighted with an orange border. The main content area displays a list of settings under the "Selling online" section. The "Website preferences" row is highlighted with an orange border, and a red arrow points to the "Update" button next to it. Other settings include "eBay ID", "PayPal buttons", "Credit card statement name", "VAT", "Custom payment pages", "API access", and "Invoice templates".

eBay ID	Link my eBay ID to my PayPal account.	Update
Selling online		
PayPal buttons	Manage my payment buttons.	Update
Credit card statement name	Name of my business as it appears on customer card statements: VANDAKHA	Update
VAT	Set up sales taxes for multiple regions.	Update
Custom payment pages	Set up PayPal payment pages to look like my website.	Update
Website preferences	Bring customers back to my website after they pay with PayPal.	Update
API access	Manage API credentials to integrate my PayPal account with my online shop or shopping cart.	Update
Invoice templates	Create and manage my invoices.	Update

Step 4: Switch "Auto Return" to ON (*optional but definitely recommended*).

Auto Return for Website Payments

Auto Return for Website Payments brings your buyers back to your website immediately after payment completion. Auto Return applies to PayPal Website Payments, including Buy Now, Subscriptions and Shopping Cart. [Learn More](#)

Auto Return: On Off

Step 5: Use the following link in the "Return URL" (*in case Paypal has asked you to fill in the auto return URL*).

<https://www.fusionhq.com/index.php?act=payredirect&todo=success>

Return URL: Enter the URL that will be used to redirect your customers upon payment completion. This URL must meet the guidelines detailed below. [Learn More](#)

Return URL: 

Return URL Requirements: The following items are required in order to set up Auto Return.

Step 6: Switch "Payment Data Transfer" ON.

Payment Data Transfer (optional)

Payment Data Transfer allows you to receive notification of successful payments as they are made. The use of Payment Data Transfer depends on your [system configuration](#) and your Return URL. Please note that to use Payment Data Transfer, you **must** turn on Auto Return.

Payment Data Transfer: On 
 Off

Identity Token: q_eb-_Zrms3hBuTds72Znz8obbICif0XVjjYnVqEaeqGSa2t_9isZnS9uKi

Step 7: Click "Save" to save your changes.

Step 8: Inside the "Getting paid and managing my risk" section, click "Update" at "Instant payment notifications".

Getting paid and managing my risk		
My automatic payments	Manage the subscriptions and automatic payments that I offer my customers.	Update
Instant payment notifications	Integrate PayPal payment notifications with my website.	Update
Block payments	Limit payments, add instructions and more.	Update
Customer service message	Create a personalised message for customer disputes.	Update

Step 9: Switch "Choose IPN Settings" ON.

Instant Payment Notification (IPN)

[Back to My Profile](#)

Instant Payment Notification (IPN) is a PayPal feature that sends messages about payments (and other transactional events) directly from PayPal to your website(s) back-end systems. You can view up to 28 days worth of messages. You can also

- Resend messages not received by your website's back-end systems
- Temporarily stop receiving messages (useful when performing maintenance on your back-end systems)

Messages are generated but stored at PayPal until you start receiving them again.

Use the IPN feature in these situations:

- Your service provider, cart provider or website developer has asked you to
- You have back-end systems that require IPN messages to automate business processes, such as creating delivery notifications and inputs to accounting applications.

[Learn more](#) about the IPN feature.

To start or stop receiving IPN messages and to decide where to send them, click the **Choose IPN Settings** button.

[Choose IPN Settings](#) 

Step 10: Enable the "Receive IPN messages" and use the following link in the "Notification URL".

<https://www.fusionhq.com/index.php?act=payredirect&todo=ipn>

Then, save your settings.

Edit Instant Payment Notification (IPN) settings

[Back to My Profile](#)

PayPal sends IPN messages to the URL that you specify below.

To start receiving IPN messages, enter the notification URL and select **Receive IPN messages** below. To temporarily stop receiving IPN messages, select **Do not receive IPN messages** below. PayPal continues to generate and store IPN messages until you select **Receive IPN messages** again (or turn off IPN).
