

How to Setup the Time Delay of Your Pages

"Time Delay" feature can be used if you want to release or delay the showing up of a page on a certain date. You can set a time delay for any pages in your "Content Sites".

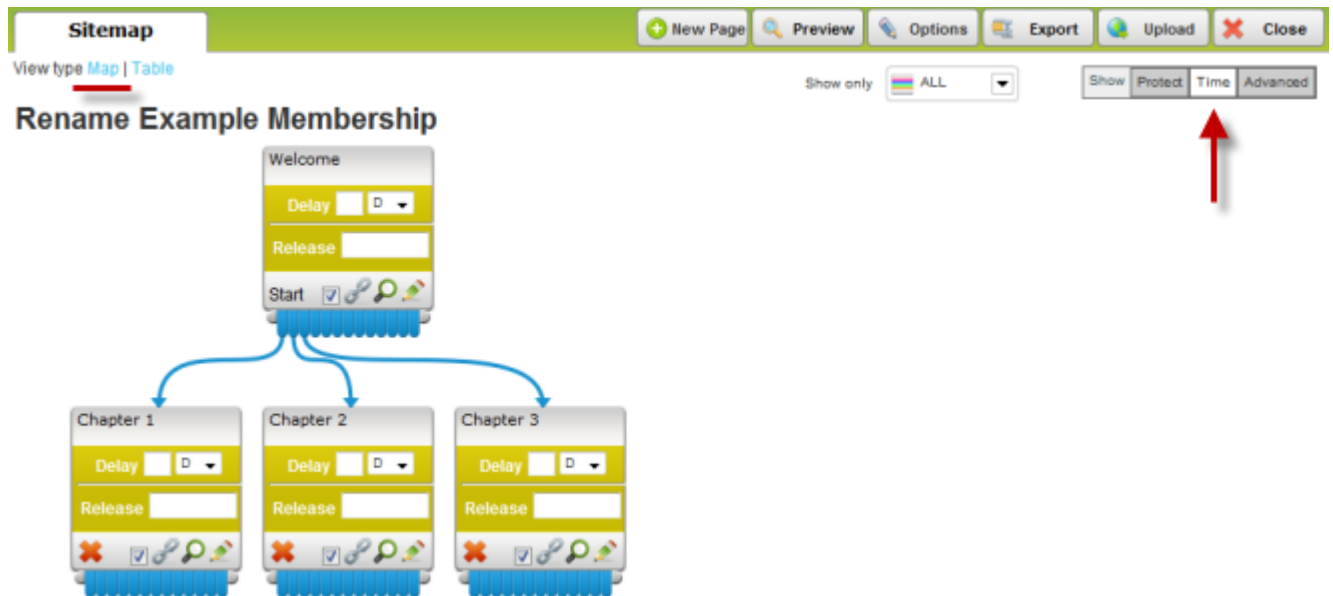

Step 1: Go to "Sites" and click on "Content Sites".

Step 2: Click the "Edit" button of the page or simply click the Site Name.

Step 3: When you're in the site map, for "Map" view type, click on "Time" seen at the upper right corner of your page, just below the tabs. This will show the "Delay" and "Release" elements of the pages.

Step 4: For "Tree" view type, you will see "Time release" option.
