

How to Upload Files to Your Website Through FTP

If you have added a file to the **"Product"** section and get a yellow bar warning on the browser, uploading through FTP is a good alternative solution. Make sure you have already installed a FTP tool to your computer. It is a **"free"** downloadable software on the internet. Then follow the instructions below.

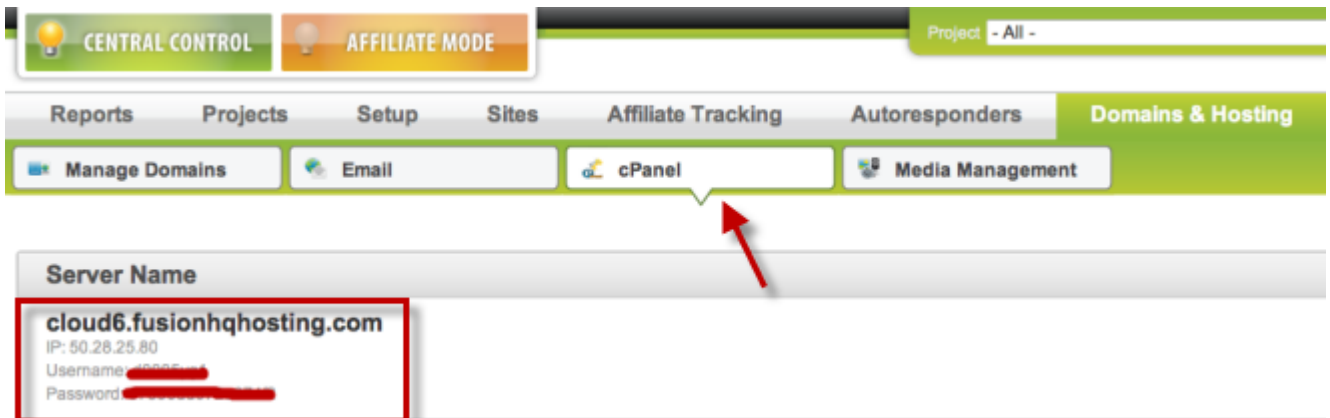

Step 1: Open the FTP tool which you have already downloaded. This tutorial is using **"FileZilla"**.

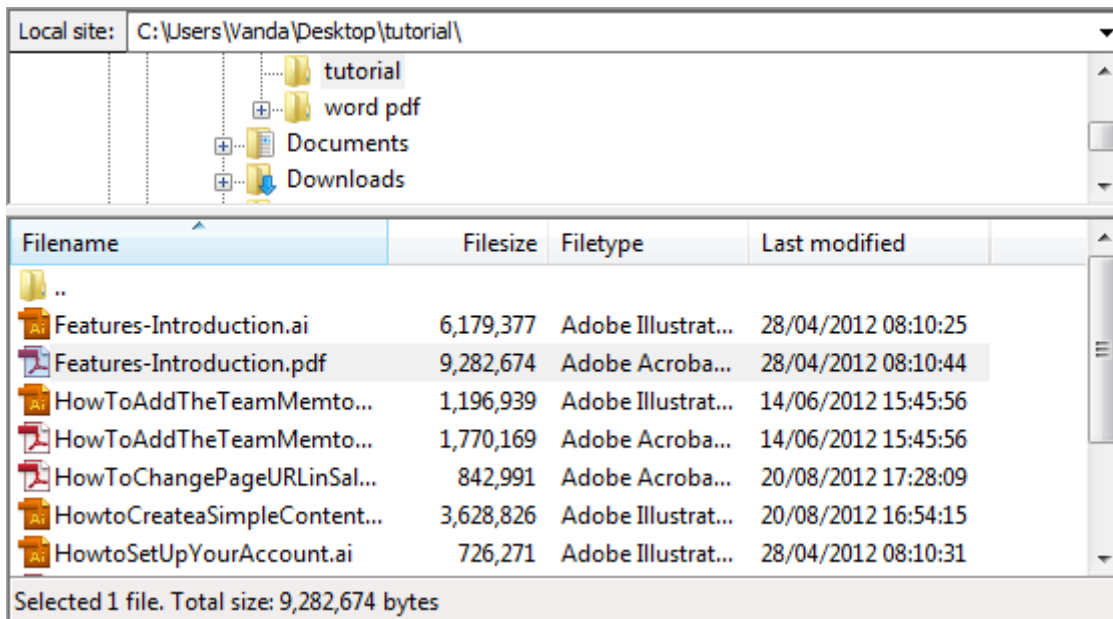

Step 2: Enter the ftp details. If you can't recognize what it is, please contact your hosting provider.

Step 3: For FusionHQ hosting user, you can get the ftp details in the cPanel section. Then use the "IP, Username & Password" as mentioned under the "cloud6.fusionhqhosting.com". Be careful of any space while copying.

Step 4: On the left side, it is "Local site" which is the location of your file in the computer.

Step 5: The right side or "**Remote site**" is the location (path) which your file will be uploaded to.

Remote site: /public_html

Filename	Filesize	Filetype	Last modified	Permissions	Owner/Gro...
..					
fusionhq_...	32	Chrome H...	07/10/2011 04:...	0644	1774 1773
.htaccess	0	HTACCESS...	09/10/2010 16:...	0755	1774 1773
zccmmnv...		File folder	17/07/2010 16:...	0755	1774 1773
yourxl8er...		File folder	09/08/2012 06:...	0755	1774 1773
wayofthe...		File folder	09/08/2012 06:...	0750	1774 99
uiuieeee...		File folder	17/07/2010 17:...	0755	1774 1773

2 files and 49 directories. Total size: 32 bytes

Step 6: Go to the following path **"/public_html/fhq_storage/xxxxxx"**. The **"xxxxxx"** is your FusionHQ membership number. It's the only one folder under the **"fhq_storage"** folder.

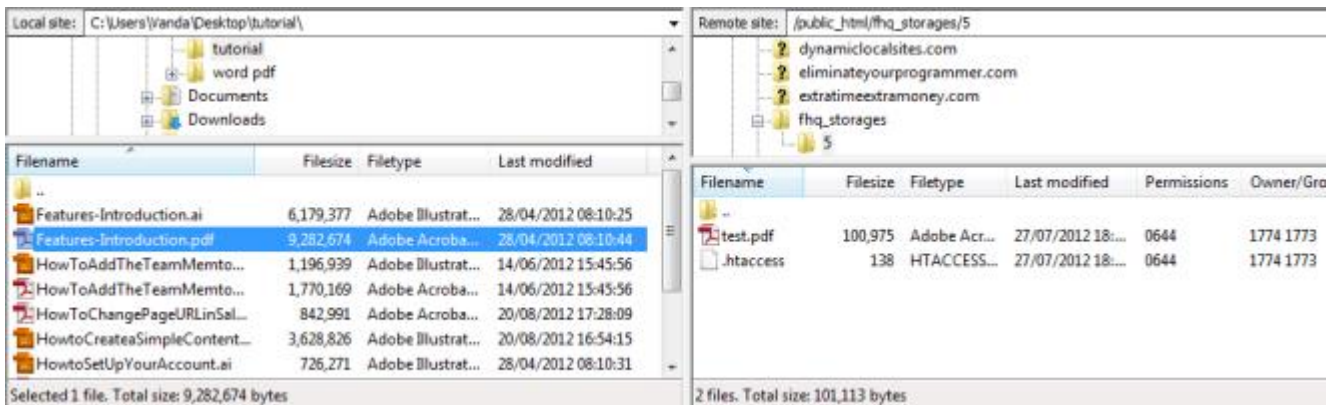

Remote site: /public_html/fhq_storages/5

Filename	Filesize	Filetype	Last modified	Permissions
..				
test.pdf	100,975	Adobe Acr...	27/07/2012 18:...	0644
.htaccess	138	HTACCESS...	27/07/2012 18:...	0644

2 files. Total size: 101,113 bytes

Step 7: Then drag the file from the left side (**Local site**) to the right side (**Remote site**). Then the ftp will transfer your file from its original location to the remote site.

Step 8: Once the file is successfully uploaded, you will see its copy on the right side (**Remote site**).
