

# How to Use the Buy Now Button (Content Site)

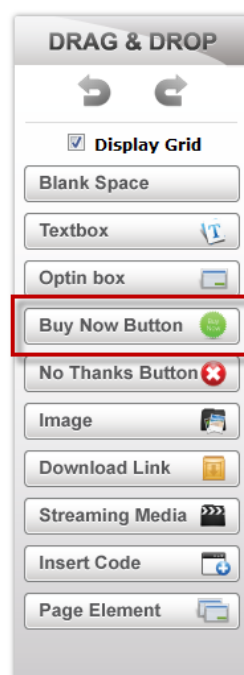

Before you can use the "**Buy Now**" button on your sale page in the content/membership site, please make sure that you have already set up your product and its payment option correctly. You cannot use the "**Buy Now**" button with the free product.

Please follow the instructions below to use the "**Buy Now**" button correctly.

**Step 1:** Edit the page where you want to use the "**Buy Now**" button by clicking on the pencil icon.

**Step 2:** Then in the "**Drag & Drop**" module, choose "**Buy Now Button**" element. Drag this element into your page.

**Step 3:** Choose the product from the dropdown element.

- Also choose the payment type for this particular product.

- If your product is a physical product, you will be able to insert a quantity of your product in the **"Quantity"** textbox. It means that with one purchase, your customers will be receiving any number of items of your product.

- Tick on the **"Add to cart instead of processing payment"** box to enable the shopping function if you want to use the shopping cart.

- For the **"Next page (after purchase)"**, choose the page from the dropdown menu. It is the page that your customers will be redirected to after they pay.

- For the **"Display Type"** you can choose **"My Images"** or **"Text"**. You can type down your own text. Or click **"Browse"** to select the pre-made image. You can upload your own image.

- Choose **"Apply"** after everything is set.

**Element Options**

**Buy Now Options**

Product → Dress

Payment → [PAYPAL] CHDR069

Quantity → 1 ←

Add to cart →  Add to cart instead of processing payment

**Link Options**
