

How to Use the Custom Tags to Give the Log In Details

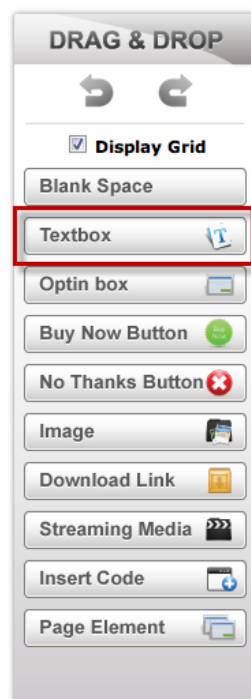

You can insert the custom tags on your FusionHQ page and our system will replace its value automatically. These tags allow you to give the log in details of your membership site to the members.

Please follow the instructions below.

Step 1: Go to the page which you want to use the tags.

Step 2: Drag the "Textbox" element to the content area.

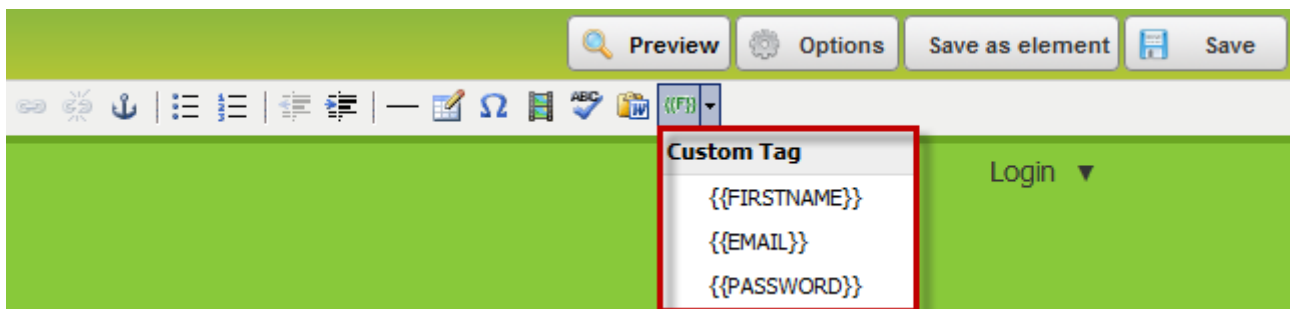

Step 3: Double click or click the pencil icon to edit the text content.

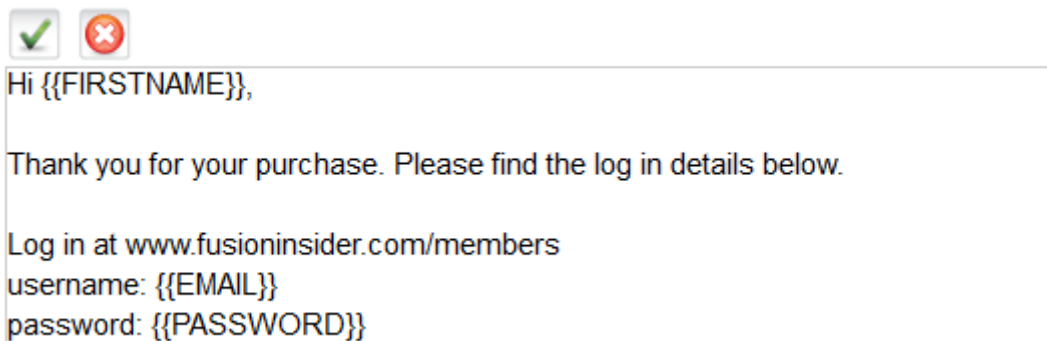

Step 4: At the editing menu, you will find the tag icon on the far right. It is the "F" alphabet.

Step 5: Select the custom tag that you want to use. Note that, our membership system will use the email as the log in username and the password will be automatically generated.

Step 6: Once finish, click the check icon to close.

Then save changes of your page.
