

How to Use The External Hosting Service (3rd Party)

Don't have FusionHQ hosting? Don't worry. You are allowed to upload your website although you are using other hosting service provider (ie. *Hostgator* or *Bluehost*, etc) to host your domain. **Make sure that you already have the correct ftp details (host, username & password and directory path) from them.** Firstly, you need to create the 3rd party hosting profile and verify your domains.

Here's how:

Step 1: Go to "Setup" and then "3rd Party".

Step 2: Create a profile at the "External Hosting" section.

Step 3: Select the "Connection Type". Fill in the FTP host, username and password. If you need to, tick the "Show" box to see the password characters. Then click "Save".

FTP Host: ftp:// ← Port:

Username: →

Password: → Show Characters

Step 4: Next, go to "Domains & Hosting" and then "Manage Domains". Type in your domain in the "Add Domain" box and click the button.

Step 5: Now, click "Verify" button.

Domain Name	Register	Host		
 chonlawat.com Domain is not verified.	This domain has been registered outside of FusionHQ. If you're the owner and want to use this domain, click "Verify"			
tanyasalemkt.helpfor.biz Created: n/a, Expires: n/a				
tanyasqueeze.helpfor.biz Created: n/a, Expires: n/a				
trafficultimatumreview.com Domain is now verified.				
tester7.doubleexpert.com Main domain is not verified.				

Step 6: Select "Other hosting" option. Choose the hosting profile that you have just created from the dropdown. Enter the "Remote Path". Some providers might call it "Root Path" or "Directory Path". **If you don't know what it is, please contact your hosting provider.** Next, click "Verify" to save these changes.
