

What Are Yes 1, Yes 2 & Yes 3?

When you use the "Optin Box" or the "Buy Now" button, you may see the option to select the "Yes" connection. There are "Yes 1", "Yes 2" and "Yes 3". These "Yes" are the link node which will redirect your customers to the next page.

For the "Optin Box", after you select the optin list, you will definitely find the "Use connection" option. If you select the optin list which links to the external provider (ie. Aweber, Mailchimp, Gotomeeting or etc), you will find only this option. You can select either "Yes 1", "Yes 2" or "Yes 3" option. The choice is yours.

Button ▼

Add field (** required field)

<input checked="" type="checkbox"/> Email**
<input checked="" type="checkbox"/> Firstname
<input type="checkbox"/> contact us

Then at the "Funnel Map" or "Sitemap", you need to link what you have selected at the "Use connection" to the next page. It's the page that your customers will see after they optin.

For any optin list which links to FusionHQ mailer, you will see 2 options: **"Use connection"** & **"Double optin link"**. The difference between these 2 options is **"Use connection"** is the page that your customers will see after optin and the **"Double optin link"** is the page that your customers confirm your list. If you have only one page after the opting in, you can make both options the same **"Yes"**.

Double optin link ←

Template

Button

Add field (** required field)

<input checked="" type="checkbox"/> Firstname
<input checked="" type="checkbox"/> Email**
<input checked="" type="checkbox"/> street
<input type="checkbox"/> street

At the **"Funnel Map"** or **"Sitemap"**, you only need to link the **"Yes 1"** to that page.

Or you can choose it differently. For example "Yes 1" & "Yes 2".

Element Options

Opt-in: 7dayssubscriber optin

Use connection: YES1

Double optin link: YES2

Template: [Pure White] Browse

Button: ./img_optin/freeins Browse

Add field (** required field)

<input checked="" type="checkbox"/> Firstname
<input checked="" type="checkbox"/> Email**
<input checked="" type="checkbox"/> street
<input type="checkbox"/> street

Then at the Funnel Map / Sitemap, you make the link of both "Yes 1" & "Yes 2" to the same page.

Or if you have 2 different pages, you can make link of "Yes 1" & "Yes 2" differently so your customers will see the different pages.

For the "Buy Now" button, at the "Link options", you can also use the "Use Connection Link". Select "Yes 1", "Yes 2" or "Yes 3".
