

What Is the "Redirect URL"?

The redirect URL can be used if you would like to link your site or page to an external webpage which is not in the same funnel or membership site or not inside FusionHQ. This feature can be located when you are adding a new page.

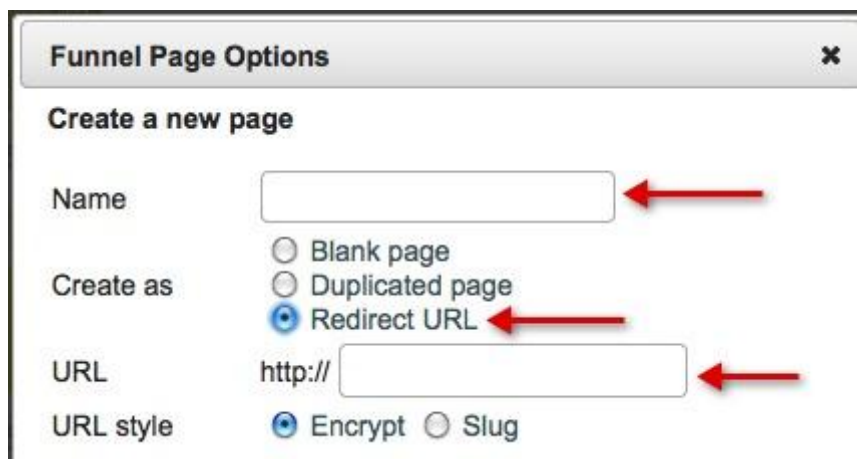

All you need to do is type in the URL of the page that you would like to be linked to and make a link connection from the previous page to this redirected URL.

Follow these steps...

Step 1: Go to "Funnel Map" or "Sitemap". Click "New Page".

Step 2: Enter the name of your new page in the "Name" textbox. Then choose "Redirect URL". Now type in the URL of this redirect page in the "http://" textbox.

A screenshot of a dialog box titled "Funnel Page Options" with a close button (X) in the top right corner. The dialog contains the following fields and options:

- Create a new page**
- Name:** A text input field with a red arrow pointing to it.
- Create as:** Three radio button options: "Blank page", "Duplicated page", and "Redirect URL" (which is selected with a blue dot and has a red arrow pointing to it).
- URL:** A text input field with "http://" pre-filled and a red arrow pointing to it.
- URL style:** Two radio button options: "Encrypt" (selected with a blue dot) and "Slug".

Step 3: Click "Save".

Step 4: And here's your new redirect page.
