

What Is the "Save as element"?

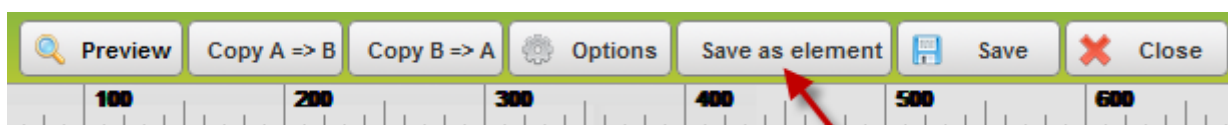

The "Save as element" allow you to save the entire page as a template. You can use this template with other new or blank pages in your website so they will look the same. You can use this template in either the sale funnel or the content sites. It's very easy.

Here's how:

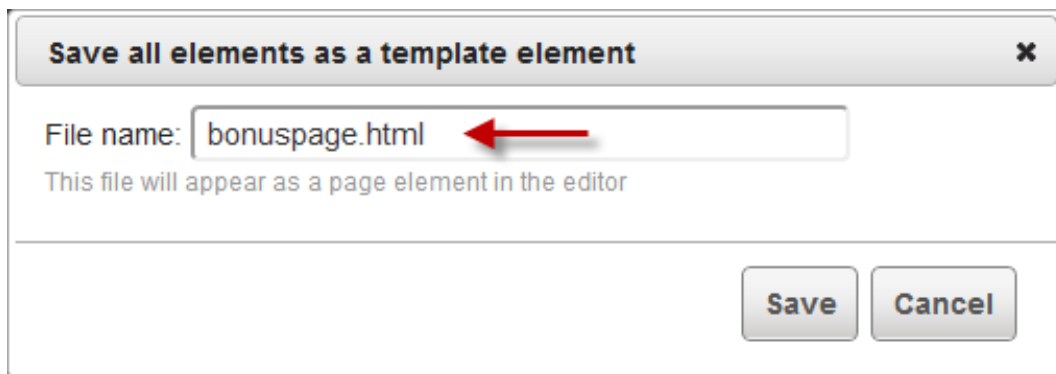

Step 1: Open to the page that you want to make it a template.

Step 2: Click "Save as element" on the top right corner.

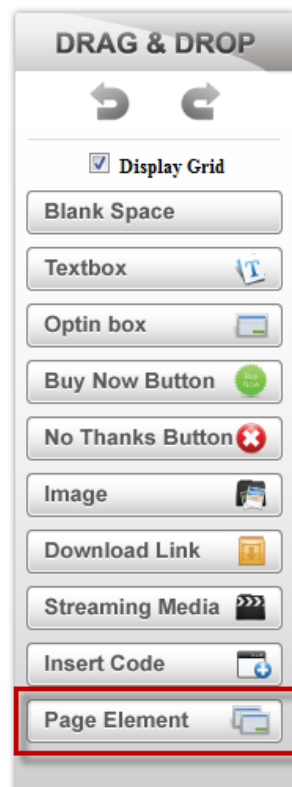

Step 3: Enter the name of this newly created template and save.

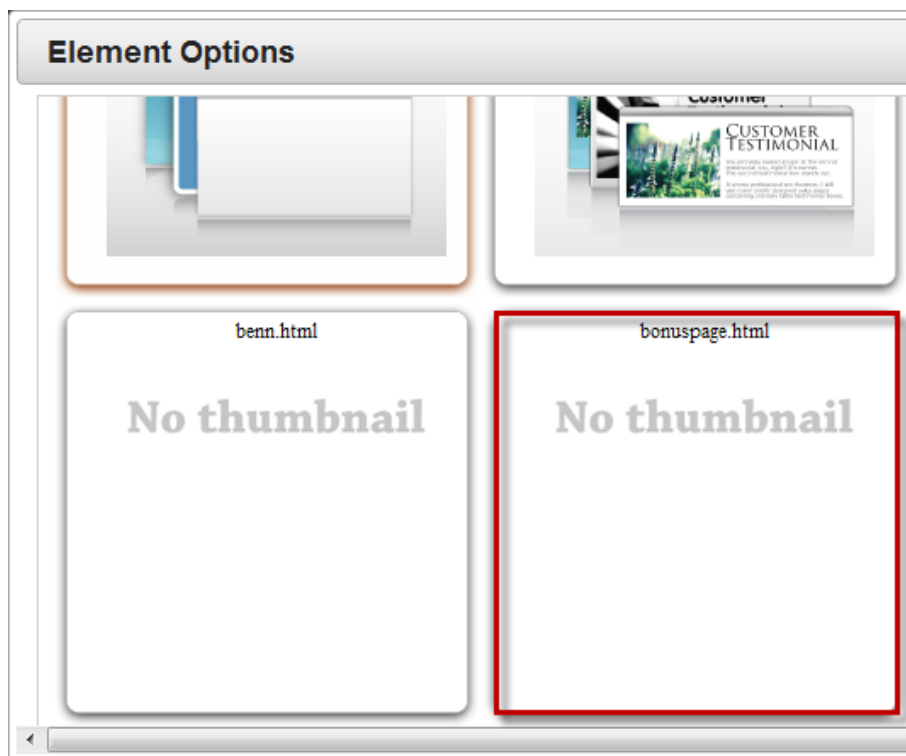

Step 4: If you want to use this template, go to any blank page. You can create a new page or use the existing page.

Step 5: You can find this template at the "Page Element".

Step 6: Select the template you have just created.

Apply and save changes.
