

What is "Test Mode"?

"Test mode" allows you to test an entire sale flow including payment. When you activate test mode, the price of your product is set to \$0.10. Once you've finished testing your buying process you can deactivate test mode, so that your product returns to the real price. This tutorial will show you how to set up "Test Mode" and how to use it. Make sure you've set up your product first.

You can use this function with Paypal, Authorize.net & 2Checkout payment gateways only. For ClickBank, you will be able to generate the test credit card from your ClickBank account. Other providers do not support the "Test Mode" function.

Then, here it is.

Step 1: Go to the product which you want to test its purchase. Click the "Edit" button or its name to get access.

Product Name	Sales	Revenue		
Dress	2	0.20	Edit	Delete
Free product	0	0.00	Edit	Delete
Give Away Product	2	20.00	Edit	Delete
January product	5	0.40 0.40 USD 0.10 THB	Edit	Delete

Step 2: Click "Add Payment Option" button or you can edit any existing payment options.

Now set payment options here
(leave this if the product is free)
